DETAILED ACTION

Allowable Subject Matter

1. Claims 1-8 are allowed.
2. The following is an examiner's statement of reasons for allowance: The most relevant prior art of reference was that which was submitted by the applicants. However, it does not teach nor fairly suggest singularly or in any combination thereof a transition-metal chalcogenide crystal having a topological configuration/structure. A micro-droplet of a chalcogen element such as S, Se or Te, is condensed and circulated in suspended form in an atmosphere containing a Group IVb, Vb or VI transition metal element, such as Nb, Ta, Zr, Ti, Hf or W, together with the chalcogen element. Then, micro-whiskers of a transition metal chalcogen-element micro-droplet by the action of a surface tension of the micro-droplet, and grown as a loop-shaped crystal would around the surface of the micro-droplet to obtain a loop-shaped crystal having a twist of 0, π or 2π , wherein the crystal has a ribbon-like open or closed loop configuration. The transition-metal chalcogenide crystal with the topological look-shaped microstructure can exhibit original properties peculiar to each transition-metal chalcogenide, and has multiple applicabilities.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
